CHARGING SOLUTIONS
from Tripp Lite

Mobile devices like tablets, Chromebooks, laptops and smartphones have influenced every organisation. As devices continue to multiply, finding an available outlet to charge all of them becomes increasingly difficult. These devices represent a substantial investment, both in hardware and data, and in some cases, the security risk involved in managing them can become a headache.

With Tripp Lite's wide range of solutions, from single-port USB chargers to feature-rich USB and AC mobile carts, there's a charging port for every device, no matter the level of security required.

CHARGING STATIONS & CARTS

Charge, sync and secure up to 48 devices in one locking steel cabinet. Charging stations and carts are a great way to store and keep track of mobile devices, while providing high-speed USB or AC charging, convenient syncing, comprehensive protection, clutter-reducing organisation and flexible deployment. A wide range of sizes and capacities fit any application, making them ideal for use in education, retail, government, healthcare and office environments. Stations feature support for wall mounting, as well as placement on a desk, table or floor. Charging carts come ready
to roll with locking swivel casters and a wide-grip handle.

USB CAR CHARGERS

These ultra-compact chargers turn any vehicle's 12V DC socket into a charging dock. The portable units are ideal mobile-charging solutions to toss in a bag or keep in the glove compartment. Dual-port chargers allow charging of two devices at the same time, with select models including Quick Charge 3.0 technology to ensure devices are up and running in no time.

USB CHARGING HUBS

Hubs provide multiple ports from a single USB connection in a more compact form factor than stations and carts, charging as few as one or as many as 32 devices in one location.

Ideal for classrooms, offices and retail environments, hubs provide ample charging for battery-intensive devices. Select models include USB syncing capability, allowing all connected devices to receive updates at the same time.

Devices and adapters are kept in separate, lockable compartments for comprehensive protection.

Tripp Lite Charging Solutions Quick Reference Guide

Model	Description
CHARGING STATIONS	
CS16USB	16-Device USB Charging Station, Black
CS16USBW	16-Device USB Charging Station, White
CS48USB	48-Device USB Charging Station, Black
CS48USBW	48-Device USB Charging Station, White
CHARGING CARTS	
CSC32USB	32-Device USB Charging Cart, Black
CSCXB36AC	36-Device AC Charging Cart, BS 1363 Plug
CSCXS36AC	36-Device AC Charging Cart, Schuko CEE 7/7 Plug
USB CAR CHARGERS	
U280-001-C2	1-Port USB Car Charger
U280-W01-QC3	1-Port USB Wall Charger, Quick Charge 3.0
U280-002-C12	2-Port USB Car Charger
U280-C02-S2	2-Port USB Car Charger, Auto-Sensing
U280-C02-S-M6	2-Port USB Car Charger with 1.8 m Coiled Cord
U280-C02-S-QC3	2-Port USB Car Charger, Quick Charge 3.0
U280-C02-SQ-C3U	2-Port USB Car Charger, Quick Charge 3.0, UL 2089
U280-C02-C1A1	2-Port USB Car Charger, 1 x USB-A, 1 x USB-C
USB CHARGING HUBS	
U280-004	4-Port USB Charging Hub
U280-004-OTG	4-Port USB Charging Hub with OTG Hub
U280-004-UK	4-Port USB Charging Hub, BS 1363 Plug
U280-004-WS3C1	4-Port USB Charging Hub, 3 x USB-A + 1 x USB-C
U280-005-ST	5-Port USB Charging Hub with Adjustable Storage
U280-007-CQC-ST	7-Port USB Charging Hub with Quick Charge
U280-010	10-Port USB Charging Hub
U280-010-ST	10-Port USB Charging Hub with Adjustable Storage
U280-010-ST-CEE	10-Port USB Charging Hub with Adjustable Storage, CEE 7/7 Plug
U280-016-RMINT	16-Port Rack-Mount Charging Hub
U280-032-RMINT	32-Port Rack-Mount Charging Hub
